

OBEN CELIK

Product & System Architecture & AI Innovation & Customer Experience

Lisbon, Portugal · +351 912 802 444 · isaobencelik@gmail.com · linkedin.com/in/isa-oben-celik

PROFILE

I own customer care platforms and internal products to fix friction points before they reach the user. My focus nowadays is migrating legacy systems to modern architectures and embedding AI where it genuinely creates value.

EXPERIENCE

FedEx
Product Owner

Lisbon, Portugal
Apr 2025 – Present

- Owned the internal knowledge product end-to-end at FedEx, setting the roadmap, prioritizing features, and aligning platform updates directly with enterprise customer service goals.
- Shifted operations off legacy robotic process automations onto a modern, containerized front-end architecture, cutting workflow friction and improving overall platform stability.
- Ran product discovery across European care teams to consolidate fragmented regional intake systems into a single platform strategy, identifying practical opportunities to embed AI into everyday rep workflows.
- Standardized Salesforce Omni-Channel across the EMEA region, boosting automated case routing from 45% to 70% and halving the volume of cases waiting over 24 hours.
- Built Power BI compliance dashboards and SharePoint self-service hubs for the Omni-Channel rollout, replacing manual reporting with real-time operational metrics for leadership.
- Drove delivery across cross-functional engineering teams in a SAFe framework, converting broad business objectives into clear user stories and acceptance criteria that kept sprints focused on user impact.

Microsoft
O365 Product Engineer | Core

Lisbon, Portugal
Apr 2024 – Apr 2025

- Turned enterprise customer escalations across EMEA into structured problem statements for the Office 365 Product Group, influencing backlog prioritization for bug fixes and identifying unaddressed feature gaps.
- Partnered directly with engineering on root-cause analysis for complex security and compliance issues (RMS templates, sensitivity labels), designing test cases to validate fixes before release.
- Analyzed patterns across high-impact cases to escalate systemic platform flaws for permanent engineering fixes rather than temporary workarounds, cutting repeat ticket volume.

International Testing & Training Services (ITTS)
Senior Product Specialist

Lisbon, Portugal · Istanbul, Türkiye
Mar 2020 – Apr 2024

- Directed technical delivery for an online testing platform spanning 70+ countries, maintaining a consistent success across complex multi-region rollouts.
- Acted as the voice of operational and end users during platform development, defining functional requirements and leading hands-on readiness and stress testing prior to go-live.
- Managed customer-facing web properties and commercial storefronts end-to-end (WordPress/WooCommerce), continuously refining user journeys to drive conversion and platform adoption.
- Restructured helpdesk workflows and established strict SLA baselines, eliminating resolution bottlenecks and cutting average support turnaround times.
- Administered the organizational Microsoft 365 environment, overseeing tenant configuration, licensing compliance, and identity lifecycles.

Product Specialist

Apr 2018 – Mar 2020

- Promoted to Senior.

Atos

System Engineer

Istanbul, Türkiye
Aug 2017 – Mar 2018

- Maintained 24/7 infrastructure availability and incident resolution across multi-client enterprise data centers, protecting stringent SLA commitments for accounts in retail, and finance.
- Ran ITIL incident and problem lifecycle coordination end-to-end, diagnosing system outages using tools like SCOM, TACACS, and Cacti to route clear root-cause data to senior engineering.
- Drove continuous service improvement by designing automated alert handlers, eliminating manual intervention on recurring false-positives and speeding up standard recovery tasks.

Greenpeace

IT Engineer

Istanbul, Türkiye
Feb 2017 – Aug 2017

- Developed a Python scripting solution that automated workstation provisioning, reducing setup time to under five minutes and removing recurring manual tasks.
- Supported regional end-users across multiple offices, managing technical ticket resolutions for diverse operating platforms.
- Implemented and maintained robust encryption and PKI infrastructure to safeguard the organization's sensitive communications.

EDUCATION

NOVA IMS Information Management School

MSc Information Systems Management (in progress)

Lisbon, Portugal
Sep 2025 – Jul 2027

Beykent University

BSc Electrical, Electronics and Communications Engineering

Istanbul, Türkiye
Sep 2011 – Jun 2016

SKILLS

Product: Product Management · Product Planning · Backlog Management · Requirements Gathering · User Stories & Acceptance Criteria · Stakeholder Management

Delivery: SAFe · Agile Delivery · Programme Management · Process Improvement

Platforms & Tools: Salesforce (Omni-Channel) · Robotic Process Automation (RPA) · Power BI · SharePoint · Microsoft 365 · WordPress / WooCommerce · Python (scripting)

Domain: Customer Experience Systems · AI Innovation · Service Delivery & SLA Management · ITIL · Information Security & Compliance · System Architecture ·

CERTIFICATIONS

SAFe® Product Owner / Product Manager (POPM 6.0) · Gen AI · CCNA · Windows Server Administration · COPC High Performance Management Techniques
