

OBEN CELIK

Product Manager | Customer Experience & AI Innovation

Lisbon, Portugal · +351 912 802 444 · isaobencelik@gmail.com · linkedin.com/in/isa-oben-celik

PROFILE

Operations-to-product leader with over seven years in enterprise infrastructure. I design scalable solutions by translating real-world workflows into visionary product roadmaps. At FedEx, I define the strategic direction for customer care technologies, consolidating fragmented platforms and embedding AI innovation to drive measurable business outcomes.

EXPERIENCE

FedEx Customer Care Engineer / Product Owner	Lisbon, Portugal Apr 2025 – Present
- Established and owned the knowledge product within FedEx, strategically guiding its evolution and prioritising alignment with overarching business goals. - Led the transition from legacy robotic processes to a scalable, custom containerised front-end architecture, streamlining service journeys and enhancing operational efficiency. - Executed product discovery to consolidate fragmented requirements within European customer experience systems into a unified platform strategy, driving scalable value and embedding AI opportunities. - Led the standardisation of Salesforce Omni-Channel across EMEA, elevating automated case distribution to 70% and halving resolution wait times, aligning operational tech with long-term customer experience goals. - Developed SharePoint-based self-service resources and Power BI compliance dashboards for the Omni-Channel project, streamlining operations and improving visibility. - Managed end-to-end product delivery in a SAFe environment, translating high-level business objectives into unified, prioritised user stories that maximised engineering focus on long-term CX goals.	
Microsoft Support Engineer	Lisbon, Portugal Apr 2024 – Apr 2025
- Translated enterprise-level customer pain points into structured problem statements that directly informed feature gaps and bug prioritisation in the Office 365 Product Group. - Partnered with engineering for root-cause analysis on complex security and compliance cases, ensuring stable and scalable system performance pre-release. - Communicated technical trade-offs and alignment decisions to non-technical stakeholders, ensuring clear expectations on product scope and timelines.	
International Testing & Training Services (ITTS) Senior Test Support Specialist	Lisbon, Portugal · Istanbul, Türkiye Mar 2020 – Apr 2024
- Led technical delivery of a global online testing service across 70+ countries, sustaining a 95%+ session success rate. - Represented operational and user needs in the platform's development cycle, contributing to requirements definition and leading user acceptance testing. - Owned the end-to-end management of digital properties and commercial storefronts, optimising user experience to support business growth. - Defined and managed SLA targets, redesigning helpdesk workflows to significantly reduce resolution times. - Managed Office 365 administration, including tenant configuration and user lifecycle management.	
Test Support Specialist	Apr 2018 – Mar 2020
Promoted to Senior Test Support Specialist.	

Atos

System Support Specialist

Istanbul, Türkiye
Aug 2017 – Mar 2018

- Managed enterprise infrastructure reliability and incident management across a multi-client data centre environment, ensuring high SLA compliance and system uptime.
- Executed ITIL-based incident and problem resolution processes, bridging the gap between operational diagnostics and engineering escalation.
- Contributed to continuous service improvement, identifying automation opportunities to reduce manual intervention on recurring alerts.

Greenpeace Mediterranean

Junior Support Engineer

Istanbul, Türkiye
Feb 2017 – Aug 2017

- Developed a Python scripting solution that automated workstation provisioning, reducing setup time to under five minutes and removing recurring manual tasks.
- Supported regional end-users across multiple offices, managing technical support and ticket resolution across diverse operating platforms.
- Implemented and maintained robust encryption and PKI infrastructure to safeguard the organisation's sensitive communications.

EDUCATION

NOVA IMS Information Management School

MSc Information Systems Management (in progress)

Lisbon, Portugal
Sep 2025 – Jul 2027

Beykent University

BSc Electrical, Electronics and Communications Engineering

Istanbul, Türkiye
Sep 2011 – Jun 2016
